REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The combination of claimed features not found in the prior art are as follows: The prior art disclosed compression and decompression of data and programs transmitted to/from processors using stored compression/decompression software; updating of data/programs stored in a nonvolatile (and in particular flash) memory (including updating firmware) that was stored in compressed form involving decompression of the data/program by a preloaded decompression program. However the prior art did not disclose the additional claimed feature (in independent claims 1,17,22,29) of receiving (from communications means or link or interface) an uncompressed portion comprising a decompression program and compressed portion (comprising program means or firmware to be executed by the processor) that was then stored in the non volatile memory and thereafter decompressed using the received decompression program.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Coleman whose telephone number is (703) 305-9674. The examiner can normally be reached on Monday-Thursday.
